# ABOUT THE EXPERIENCE

The Juventus Training Experience is a football journey designed to immerse players in the culture, methodology, and standards of one of the world's most iconic football clubs.

Hosted in Italy, this experience allows players to train like a Juventus Academy player, following the Juventus methodology delivered by Juventus academy coaches. Sessions focus on technical, tactical, decision making, and game intelligence, mirroring the training environment used across the Juventus global academy network.

Beyond the pitch, players will experience the heritage and values of Juventus Football Club, including professionalism, discipline, teamwork, and respect. The programme combines high level football training with cultural experiences such as visits to world-class facilities and opportunities to connect with players from other Juventus international academies.

This trip is designed not only to improve players as footballers, but also to help them grow in life experience, independence, and maturity but most importantly, creating memories and lessons that extend far beyond the game.
